

# **Mobile energy storage container 40-foot cooperation at drilling site**

## Overview

---

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

What is a 40ft containerized battery energy storage system?

AZE's 40Ft containerized battery energy storage system comes in scalable containerized modules ranging from tens of kWh to MWh energy capacities. The solutions offers plug-and-play features that allow rapid installation at low installation costs.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

## Mobile energy storage container 40-foot cooperation at drilling site

### How is the drilling site prepared for operations?

Installation of Drilling Infrastructure Installation of drilling infrastructure is a critical phase in the preparation of a drilling site for operations. After the drilling pad has been constructed, the next ...
