

# Myanmar Electrochemical Energy Storage Subsidy

## Overview

---

Does Myanmar have a low-carbon energy sector?

Currently, there is a lack of international aid and investment in low-carbon development projects for the energy sector in Myanmar. Some of Myanmar's neighboring countries are among the largest emitters of greenhouse gases in the world. Although Myanmar's greenhouse gas emissions are low, these side effects affect our country.

What is the 2015 Myanmar energy master plan?

Tell us and we will take a look. The 2015 Myanmar Energy Master Plan is put forward by the Asian Development Bank and Myanmar Ministry of Energy in order to analyse energy demand development from 2014 to 2035 along five supply expansion scenarios.

Will Myanmar achieve 20% energy savings by 2025?

According to the National Energy Efficiency & Conservation Policy, Strategy and Roadmap of Myanmar by the Asian Development Bank in 2015, Myanmar aims to achieve 20% energy savings in the electricity sector between 2020 and 2030. Specifically, the targets include a 12% reduction in 2020 and a 16% reduction by 2025.

What is Myanmar's energy policy?

Myanmar's energy policy aims to increase the use of its abundant water resources for hydropower development to reduce the need for fossil fuel power generation. Energy efficiency management can reduce energy consumption to minimise harmful environmental impacts.
