

# Netherlands Deep Energy Storage Project

## Overview

---

Will Giga storage build a 300 MW battery in the Netherlands?

Dutch energy storage company GIGA Storage has started building a 300-MW/1,200-MWh battery in the Netherlands after closing on a roughly EUR-300-million (USD 341.2m) funding deal for the project. Image by: GIGA Storage.

Will Giga storage be Europe's largest project?

Strategically positioned at the connection between the Netherlands, Belgium, and Germany, this 700 MW/ 2,8 GWh project should be the largest in Europe.” says Vincent Menager, Investment Director at InfraVia, which invested in GIGA Storage in 2024. “We are very pleased with the outcome of the debt raising exercise.

How big is RWE's battery storage project?

The company has now started construction of its first utility-scale Dutch battery storage project with an installed power capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt-hours (MWh). A total of 110 lithium-ion battery racks will be installed at RWE’s biomass plant in Eemshaven on an area of around 3,000 square metres.

How many lithium-ion battery racks will be installed in Eemshaven?

A total of 110 lithium-ion battery racks will be installed at RWE’s biomass plant in Eemshaven on an area of around 3,000 square metres. The storage system is planned to supply control energy and to operate in wholesale markets as of 2025.
