

# **New energy battery cabinet warranty period**

## Overview

---

In general, most suppliers offer a warranty period ranging from 1 to 5 years for their battery cabinets. However, some high-end products may come with a warranty period of up to 10 years or more. When does a lithium battery warranty start?

The product warranty starts from no later than three months after the product arrival or no later than six months after the product shipment. Two parties negotiate to specify the start date based on project conditions. The standard warranty period of lithium batteries is one year.

What is the warranty period of the battery?

Remember that the warranty period of the battery is 1 year and if the battery is found defective through diagnosis by an engineer at the center, the battery will be replaced free of charge within the warranty period. Condition 2: The charger is abnormal (failed) or there is another object on the charging terminal.

Do I need an extended warranty on a lithium battery?

If extended warranty is required, consult the SSD and evaluate the maximum service life of lithium batteries based on the battery model and application environment. Extended warranty can be provided within the service life and needs to be quoted. Subject to the feedback from the local spare parts contact person.

When does a product warranty start?

The product warranty starts from the date when the preliminary acceptance certificate is issued, the date when the product is put into commercial use, or the date when the product is put into operation on the network, whenever earlier. Scenario 2: Party B is responsible for product installation.
