

New independent energy storage in the Middle East

Overview

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

Why is Middle East energy launching a 49th consecutive year in Dubai?

“The continued organization of Middle East Energy for a 49th consecutive year in Dubai reflects international confidence in the emirate as a strategic centre for conferences and exhibitions, and reinforces its role in leading the global dialogue on energy security and sustainability,” stated Sheikh Ahmed.

Should a MENA energy storage alliance be established?

A report by Arab Petroleum Investments Corporation recommends establishing a MENA Energy Storage Alliance, supported by public-private partnerships, and offering financial incentives like tax benefits and green financing to attract private sector investments.
