## New solar panels in Lyon France

## Overview

---

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

How many solar installations are there in Lyon Confluence?

The neighbourhood has more than 40 solar installations, says Bruno Gaidon of Hespul, an association specialising in renewable energies, which advises Lyon Confluence. He adds, "This neighbourhood is a kind of laboratory for what will be generated in France in future.".

How much does it cost to install solar panels in France?

He only has to use electricity from the grid when there's no solar available — chiefly at night. Diab spent €17,000 having the panels installed. The sum was unusually high partly because his house is so big: the average cost of home installation in France is about €10,000, without a storage battery.
