

Nordic DC Uninterruptible Power Supply

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions provide 24 V DC power supply for up to several minutes. Equipped with ultracapacitors, these solutions are designed for long service life and operation in demanding temperature ranges.

What is a DC-UPS power supply?

DC-UPS (Direct Current Uninterruptible Power Supplies) are essential wherever reliable backup of auxiliary circuits is critical to ensure system integrity and the safety of people and equipment.

What is a capacitive ups based on ultracapacitors?

The capacitive UPS based on ultracapacitors provide the highest level of system availability in the field of 24 V DC uninterruptible power supplies. With a broad portfolio designed for various requirements and applications, they ensure uninterrupted power supply with currents of up to 40 A in the event of a power failure.

What makes Puls a reliable power supply?

Efficient, compact and reliable DC-UPS from PULS ensure highest system availability. Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an uninterrupted power supply for periods measured in seconds.
