

Nordic home solar system

Overview

Where is Nordic solar launching its first battery energy storage system?

Yesterday, Nordic Solar officially inaugurated its first battery energy storage system (BESS) park in Denmark. The facility, located in Borup in the Municipality of Hillerød, marks a great milestone in the company's strategy to integrate battery storage into its portfolio of solar energy projects across Europe.

Can solar energy thrive in the Nordics?

Solar energy in the Nordics is gaining serious momentum. With increasing installations and ambitious targets, the region proves solar can thrive even in northern climates. The rapid progress across these countries sets a clear path for solar to become a key pillar in their renewable energy future.

Why should I join Nordic solar?

Joining Nordic Solar means building a career with exciting opportunities. You will find a space to grow, learn and engage in a collaborative environment. Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available.

Which Nordic countries are embracing solar PV technology?

During the recent surge in solar PV installations, the Nordic countries – Sweden, Norway, Finland, and Denmark – have increasingly embraced solar PV technology, defying their northern geographical challenges.
