

# North America Emergency Communications Base Station Addresses

## Overview

---

Where is FEMA NPWS broadcasting?

The FEMA NPWS also serves as the primary source of initial broadcast for a national alert. This is the KHKA, 1500 AM, Primary Entry Point station in Hawaii, as seen from above.

What is Emergency Action Message (EAM)?

Emergency Action Message (EAM): A very common broadcast type which consists of an encrypted string of alphanumeric characters, usually 30 characters long. A typical EAM is broadcast according to the following procedure: "All stations, all stations, this is <callsign>, <callsign>."

What is the primary entry point station in Hawaii?

This is the KHKA, 1500 AM, Primary Entry Point station in Hawaii, as seen from above. NPWS stations are equipped with back-up communications equipment and power generators designed to enable them to continue broadcasting information to the public during and after an event.

What is a NPWS station?

NPWS stations are equipped with back-up communications equipment and power generators designed to enable them to continue broadcasting information to the public during and after an event. The NPWS can directly reach more than 90% of the U.S. population and ensures that under all conditions the President can alert and warn the public.
