

Norway Bergen solar container battery Export Company

Overview

Why did Corvus Energy move to Bergen?

In 2019, recognising the growing market for batteries for maritime use, Corvus Energy decided to move its factory and headquarters to Bergen. This relocation aimed to better serve the Norwegian market and be closer to customers, as Norway was ready to transition from traditional diesel fuel to zero-emission solutions.

Why did Corvus Energy move from Canada to Norway?

Corvus Energy supplied the battery system for the Crowley eWolf, the first all-electric tugboat in the US. The successful relocation from Canada to Norway was facilitated by effective teamwork within Team Norway. Key players included the Royal Norwegian Embassy in Canada and Innovation Norway's offices in Canada, Oslo and Bergen.

Why should you invest in Bergen?

Invest in Bergen played a crucial role on the ground, assisting Corvus Energy in selecting the site for its factory and offices in Bergen. Vestland county and Innovation Norway Vestland also provided valuable support throughout the process.
