# Off-grid solar-powered containerized type for railway stations

## Overview

---

Can solar energy be used in railway infrastructure?

As a result, integrating renewable energy sources such as solar energy with railway infrastructure can optimize the sector's energy structure and further enhance the critical role of HSRs in sustainable development.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require fuel and are noisy, this mobile power station uses solar energy with no noise pollution.

How BS-HSR's electricity demand was covered by the railway PV system?

The PV system provided power to the railway system from 5 a.m. to 7 p.m. The railway PV systems were able to cover BS-HSR's electricity demand before 6 p.m. The local railway PV generation satisfied 93.4% of the electricity demand in Jiangsu without the assistance of energy storage devices.
