

Off-grid supplier of folding containers for farms

Overview

What is a mobile solar container system?

The mobile solar container system includes solar panels, storage batteries, inverter, mounting brackets, and accessories. Solar panels collect energy from the sun and store it in the battery bank, and the inverter converts it to AC power for use.

What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

How mobile solar containers can be transported?

The solar panels' rail system and folding mechanism are fixed on a sturdy floor frame. This configuration makes it simple to transfer the mobile solar containers by trucks, trains, and cargo ships. Foldable, mobile, compact, and modularized. Mobile solar containers can be compactly stored and easily transported to different locations.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.
