

LLSE CONTAINERS

Oslo Data Center Uses 10MW Solar-Powered Containers

Overview

What makes Norway a good data center?

Uses Norway's abundant hydroelectric power, making it one of the greenest data centers in the world. Low carbon footprint and near-zero emissions. Utilizes the cold fjord water (from nearby deep-water fjords) to cool servers without electricity. This unique cooling system makes it one of the most energy-efficient data centers globally.

What makes Green Mountain data center unique?

Key Features of Green Mountain Data Center □ Powered by 100% Hydroelectric Energy Uses Norway's abundant hydroelectric power, making it one of the greenest data centers in the world.

What are the best data centers?

DC1-Stavanger (inside a mountain with fjord cooling). DC2-Telemark (located in an industrial region for high-performance computing). DC3-Oslo (for low-latency cloud services). Power Usage Effectiveness (PUE) as low as 1.2, far better than most traditional data centers (average 1.5+). Recognized for carbon-neutral operations and zero water waste.
