

# **Outdoor Solar On-site Energy Installation in China**

## Overview

---

Will China set a new record for solar power installations in 2024?

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry experts and company executives.

How many solar PV installations are there in China this year?

"Solar PV installations have maintained a quite high pace this year, and we had seen an average of over 18 GW of monthly installations this year in China till October," said Zhu Yicong, vice-president of renewables and power research at global consultancy Rystad Energy.

Can solar PV systems be developed efficiently in China?

In order to develop solar PV systems efficiently in China, and provide references to the central and local governments for RPS target-setting in terms of PV power consumption, this paper depicts reasonable deployment maps of solar PV stations at the provincial level from 2020 to 2022.

How much solar power will China install this year?

With the world's largest, most complete new-energy industry chain, China is expected to install 230 to 260 gigawatts of solar capacity this year, topping the record of 217 GW set last year, according to the China Photovoltaic Industry Association.

## Outdoor Solar On-site Energy Installation in China
