

# **Outdoor energy storage installation in Rotterdam the Netherlands**

## Overview

---

How much energy storage does the Netherlands need?

To achieve its renewable energy targets, reports in 2021 indicate that the Netherlands will need to install between 29 and 54 gigawatts (GW) of energy storage capacity by 2050. Storage with efficient management systems and digital controls is a crucial element of a reliable, flexible and affordable energy system.

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

Who is energy storage NL?

Energy Storage NL is the subject matter expert on energy storage and conversion technology. We promote awareness and knowledge about the current and future role for energy storage and conversion in the energy system. Energy Storage NL represents the broad energy storage sector towards governments and external stakeholders.

Does the Netherlands have a natural gas policy?

The Netherlands has also committed to eliminating natural gas from its energy mix entirely in favour of cleaner sources. The growth of renewable energy generation in the Netherlands and across Europe has played a vital role in decarbonising energy production.

## Outdoor energy storage installation in Rotterdam the Netherlands
