Papua New Guinea energy storage power station profit model

Overview

Should Papua New Guinea implement broader power sector reforms?

Strong political will and strengthening of institutional arrangements are urgent. The small island economy of Papua New Guinea (PNG) is facing severe electricity shortages and is therefore turning to implementing broader power sector reforms as a vehicle to attract private capital and investments in electricity generation.

What is the power sector investment plan in PNG?

TRANSFORMER CAPACITY EXPANSION PLAN Most new power sector investment in PNG over the next 10 years is expected to be organized around projects identified in the LCPDP (generation and transmission investments on the POM and Ramu grids) and the NEROP (electrification nationwide).

How to attract private investment in the power sector in PNG?

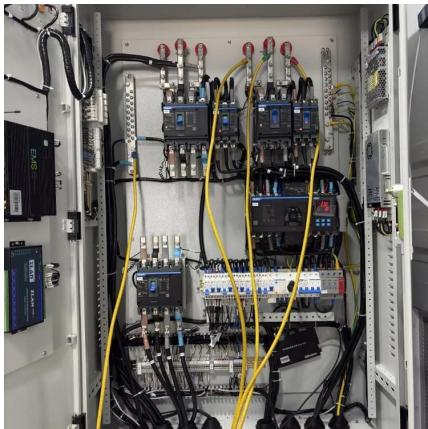

Therefore, we recommend, in the case of PNG that the power sector devotes its resources in creating and establishing appropriate regulatory institutions evolving the power sector to attract private investments in the power sector while establishment of wholesale electricity markets can wait.

Does Papua New Guinea have electricity?

Overview In Papua New Guinea (PNG), less than 10% of the population has access to electricity. Where power is available (generally in the main urban centers), the supply is often unreliable. Access to electricity is very limited in off-grid rural areas.
