

Paraguay PV combiner box supplier

Overview

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.

What is a 600v DC combiner box?

600V DC combiner box is LETOP's economical solution designed for small PV systems. It offers 1-6 string inputs and 1-2 string outputs. Supports 600V DC system voltage. It also uses high-quality components to ensure overcurrent and overvoltage protection. Suitable for 5kW-10kW small residential rooftop or small commercial PV systems.

What is a 1000v DC combiner box?

1000V DC combiner box is specifically designed for professional combining solutions. It supports 1-16 string inputs and 1-3 string outputs. The maximum support for 1000V DC system voltage. IP65/66 protection rating and optimized heat dissipation design ensure your system operates reliably in complex environments.

What is a DC combiner box?

The DC Combiner Box puts PV string monitoring front and center. It enables the system status to be continuously recorded and the string currents and voltages to be measured. Indirect current measurements using Hall-effect technology enable the prevention of power losses and the coupling of surge voltages to the monitoring system.
