

Peru solar container communication station wind power equipment

Overview

Can wind energy technology be used in Peru?

Wind energy technology on an industrial scale has already been successfully implemented in Peru, being increasingly popular and a feasible alternative to apply in different places in the territory with wind resource potential.

Will the government of Peru implement wind farms in different places?

There are high expectations that the government of Peru will promote public policies that seek the implementation of wind farms in different places in the territory, which will allow the generation of renewable energy and provide access to clean energy to more inhabitants and productive activities.

Should Peru subsidize on-shore wind energy?

With respect to economic terms, the government of Peru should avoid subsidizing on-shore wind energy, since it has demonstrated improvements in its efficiency and a reduction in its costs, in such a way as to allow for the realization of a route for off-shore wind energy that will require the creation of financing mechanisms.

How much wind energy is produced in Peru in 2023?

This installed capacity for the year 2023 is equivalent to 3% of the usable on-shore wind energy potential of 20.5 GW. In Figure 16, it is possible to see a summary indicating the amount of annual energy generated in GWh and the capacity factor of each wind farm that is in operation in Peru.
