

Portuguese Mobile Energy Storage Container 15kW

Overview

Should energy storage be democratised in Portugal?

Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year. However, this paradigm is about to change with the democratisation of energy storage solutions through wind and solar production.

Why is energy storage important in Portugal?

Renewable energies are inevitably vulnerable to variations in availability, since the sun and the wind cannot be programmed. Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year.

What types of energy storage systems does Jinko power offer?

Depending on application scenario, Jinko Power provides all types of customers with tailored energy storage system solutions, including power energy storage system integration solutions, industrial and commercial energy storage system integration solutions, and household energy storage systems.

How many GWh of electricity are generated in Portugal in 2023?

Between 1 January and 31 October 2023, 35,152 GWh of electricity were generated on the Portuguese mainland, of which 67.8 per cent came from renewable sources. The storage will be decisive for the long-awaited energy transition.
