

Price of a 20kW Solar Container for Australian Airports

Overview

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. How much does a 20 kW solar system cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. You should combine these two buckets to estimate your total project price: 20 kW PV only: ~\$19,000–\$24,000.

How much does a 20kW Solar System cost?

You can expect to pay around \$19,771 for a 20kW system installed. Prices can vary wildly depending on the quality of panels you install and the company that quotes the job. The above price is after you have received your government rebate (\$6,584 for 20kW systems) and does not include the price for battery backup.

How much does a solar battery cost in Australia?

By storing excess solar power during the day, the battery provides reliable energy during the night or during grid outages. The price of a 20kW solar battery in Australia typically ranges between \$18,000 and \$25,000 (including installation).

How much does a 20 kW battery cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh for larger systems.
