

LLSE CONTAINERS

Price quote for a 50kW collapsible container for European mining applications

Overview

What is a collapsible bulk container with extended length?

The collapsible bulk container with extended length is designed to handle extremely long and hard-to-fit parts. All extra long bulk containers are available with wide access doors and manufactured from high-density polyethylene using a structural foam-molding process for increased durability.

How many miners can a 40ft container hold?

It depends on the container size and cooling configuration. A 40ft unit can typically house 250-300 ASIC miners with proper airflow and rack layout. Capacity may vary for GPU rigs or hybrid systems. How is heat managed inside the mining container?

What is a heavy duty collapsible bulk container?

Our heavy duty collapsible bulk containers are part of the BulkPak® line and transport even bulky, hard-to-fit parts safely. At the same time, the large FLCs hold up to 900 kg. With a return ratio of up to 1 : 2,6, the collapsible bulk containers optimise space utilisation during storage and return transport.

What is a non collapsible bulk container?

The collapsible or non-collapsible bulk containers are designed to withstand the rigorous, heavy load requirements in the manufacturing environment. With a weight capacity of 900 kg and extended length footprints, the ORBIS XXLPak hold heavy and bulky components.
