

Prices of solar modules in Haiti

Overview

Can solar energy be used in Haiti?

Solar energy offers interesting prospects in Haiti, by offering energy self-sufficiency to the most isolated cities, in the absence of a power grid. The country's location in the tropics gives it very strong solar energy potential. It is believed solar energy will play a fundamental role in access to electricity over the next 10 to 15 years.

Is Haiti a solar power market?

Recently, many solar companies have seen Haiti as a huge market potential for solar energy. The founder of 10Power estimates that the potential solar power market is worth over \$500 million. In 2013, the completion of Hôpital Universitaire de Mirebalais came to an end. This hospital is the largest solar-powered hospital in the world.

Why is distributed solar PV the only energy source in Haiti?

Since only about 13% of the people even have grid access, distributed solar pv is the only energy source that can supply all the people electricity for now. Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels.

What is the solar power plant capacity in Haiti?

The solar generation capacity of the Solar Power Plant will be 1.2 MWp with a storage capacity of 800 kW / 330 kWh. in the Commune of Jacmel, in the South-East Department and will be connected to the regional electricity network of Jacmel. Haiti's 2020 total GHG Emissions (mtCO₂e) per the World Bank is 10,267.
