

Quotation for a 5MWh Solar Container Project

Overview

A 1MWh system: Costs between €695,000 and €850,000. Larger systems, like 5MWh, cost €3.5 million to €4 million, benefiting from economies of scale. What is a 5MWh energy storage system containerized?

The 5MWh energy storage system containerized is a intelligent monitoring and high protection level, and is suitable for a variety of complex scenarios to meet the energy storage needs of the industrial and commercial sectors, the electric power grid, and renewable energy. The 5MWh energy storage system container consists of 12 energy storage units.

How many energy storage units are in a 5MWh energy storage system?

The 5MWh energy storage system container consists of 12 energy storage units. A single energy storage unit is made up of 1 lithium battery cluster. Due to their high capacity and small size, 3.2V/314Ah lithium batteries make excellent energy storage containers and designs. Each battery cluster is comprised of 4 battery boxes and 1 high-voltage box.

What is a 5MWh liquid cooling system?

5MWh capacity packed into a standard 20ft container, delivering maximum energy with minimal land use. Smart liquid cooling maintains optimal performance from freezing winters to hot summers. Battery energy storage system integrated with a liquid-cooling system, provides high efficiency and flexibility for the utility-scale.

What is the scope of supply for a 5 MW solar plant?

The estimated required area for the plant is 80,000 to 90,000 m². The scope of supply will be the complete supply of solar panels and equipments for 5 MW power generation. Complete supply of solar panels and equipments for 5 MW power generation. Installation of all panels and equipments at site.
