Installing a New Circuit Breaker
A circuit breaker is designed to stop the power flow through a circuit if there is an excessive amperage drawn on said circuit. Occasionally, these breakers go bad and will need to be changed. It is highly recommended that you hire a licensed, competent, and insured electrician to perform this task, as electricity can be deadly. However, if you choose to do it yourself, make sure to follow all safety guidelines and regulations. See more on [wikihow](#) for detailed instructions.
