

Reset circuit breaker factory in Botswana

Overview

How do I Reset my breaker?

Press the reset button or flip the lever on the breaker. Turn the system back on and verify operation. Marine, industrial, and RV applications where visual inspection and manual confirmation are needed before restoring power. Prevents automatic resets, allowing time for inspection and repair.

Does a breaker need a manual reset?

No manual reset is needed — the breaker will automatically reset once it cools and the fault clears. Automotive and marine systems where manual access is limited and overloads are infrequent. Restores power without user intervention. Ideal for users who want continuous operation without having to manually reset the breaker.

How do I Reset my AC breaker after tripping?

Type I circuit breakers, such as ACBP-N, ACBP4-PL and ACB2-PL, automatically reset themselves after tripping. Find and correct the issue (short circuit or overload). No manual reset is needed — the breaker will automatically reset once it cools and the fault clears.

What is a type II circuit breaker?

Restores power without user intervention. Ideal for users who want continuous operation without having to manually reset the breaker. Type II circuit breakers, including MOCBP4-PM, MOCB-12-H and MOCB2-PCL, reset only after the power to the system is turned off and then back on.
