# Reset circuit breaker factory in Brisbane

## Overview

---

Can a circuit breaker be reset after tripping?

A circuit breaker is an electrical switch designed to protect an electrical circuit from damage caused by excess current from an overload or a short circuit. Unlike fuses, which must be replaced once blown, circuit breakers can be reset after tripping.

Is it safe to reset a circuit breaker yourself?

It's generally safe to reset a circuit breaker yourself if you follow basic precautions, like ensuring your hands are dry and standing to the side of the panel to avoid any sparks, making how to reset a breaker a simple task for most renters or homeowners.

How do I Reset my breaker?

To reset a blown fuse or tripped circuit breaker, first switch it to the 'off' position. This provides the reset state to make it safe to switch it back on. Wait for a second or two, then firmly switch the breaker to the 'on' position.

What to do if a circuit breaker trips?

Turn off and unplug everything on the circuit, then reset the breaker. If it trips, turn off the breaker and call an electrician. Power off all electrical devices connected to the circuit breaker. Any device can create a demand on a single circuit and overload it, tripping the breaker off.
