Resort uses 40-foot folding shipping container

Overview

What is a 40 ft shipping container home?

As container homes grow in popularity, the 40 ft shipping container home stands out as a cost-effective, durable, and flexible alternative to traditional housing. Builders and designers like you are using them because they can be easier on the wallet and good for the planet, while allowing you to create some really unique spaces.

How much space does a 40 foot shipping container provide?

Two 40 foot shipping containers: Two containers provide 640 square feet of available space, which is a more comfortable size. This allows for a comfortable single-bedroom layout or a compact two-bedroom, two-bath layout for small families.

Are 40 ft containers cheaper?

20 ft containers are cheaper upfront, but in the end, working with 40-foot containers is cheaper. Here's why. More space: A 40 ft container gives you double the length of a 20 ft container. That extra space means even in a single container you can fit in a proper living area, kitchen, bedroom, and bathroom.

What is the difference between a single-container and a multiple container home?

While a single-container home can provide a compact yet livable space, adding multiple containers allows for greater flexibility in design. Single 40 foot container home: A single 40 ft container offers approximately 320 sq. ft., which is ideal for a studio or small one-bedroom layout.
