

Romania Energy Storage BESS solar Project

Overview

The newly acquired 150 MW standalone BESS project is designed to provide fast-response flexibility and grid support services, helping to integrate more renewable energy into the Romanian electricity system. Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

How big would a Bess project be in Romania?

The project would be many times larger than the largest BESS online in Romania today, a 6MW/24MWh system from developer and independent power producer (IPP) Monsson (Premium access article).

How much is a self-consumption solar and storage project worth?

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly €14 million. Image: Ministry of Energy. A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.
