

Rotterdam Vanadium Flow Battery Company Netherlands

Overview

What are vanadium redox flow batteries mainly used for?

Due to their relative bulkiness, vanadium flow batteries are mainly used for grid energy storage. Also known as the vanadium redox battery (VRB), the vanadium redox flow battery (VRFB) has vanadium ions as charge carriers.

Where are vanadium redox flow batteries made?

Vanadium is readily available as a by-product of iron production. Made in Germany Our battery systems are developed and produced in the Freiburg region. We are always there for you if you need help. Vanadium redox flow batteries can be used in a variety of ways for storing and/or supplying energy.

What is a vanadium redox flow battery (VRFB)?

As global energy systems transition toward sustainability, vanadium redox flow batteries (VRFBs) are emerging as a critical technology due to their scalability, 20+ year lifespan, and deep discharge capabilities.

Where are vanadium batteries made?

No critical or ethically questionable raw materials are used. Vanadium is readily available as a by-product of iron production. Made in Germany Our battery systems are developed and produced in the Freiburg region. We are always there for you if you need help.
