Serbia energy storage explosion

Overview

How did the Russian invasion of Ukraine affect Serbia's energy supply?

A breakdown at the Nikola Tesla Thermal Power Plant, exacerbated by underinvestment and mismanagement, collided with the global energy crisis. The Russian invasion of Ukraine further heightened concerns, revealing the vulnerabilities of Serbia's energy supply, which relies heavily on Russian-owned entities.

What can Serbia do about the energy crisis?

As Serbia grapples with a multifaceted energy crisis, potential pathways forward are identified, emphasising the need for diversification in gas suppliers, facilitating the transition to renewables, and navigating the geopolitical intricacies that intertwine with environmental concerns.

What happened to Serbia's energy sector in 2021-2022?

During the winter of 2021-2022, the energy sector in Serbia was hit by a perfect storm. While the global energy crisis was peaking in December 2021, The Russian invasion of Ukraine in 2022 was another event that fundamentally endangered the whole structure of the energy supply in Serbia. Besides causing.

Could a new push to revive Serbia's stalled nuclear energy sector?

But a new push to revitalise Serbia's stalled nuclear energy sector may see the country embrace the technology again. Three years after the 1986 Chernobyl disaster in Ukraine, then Yugoslavia shuttered its nuclear programme and shut down its lone reactor in Belgrade's suburbs.
