

# **Slovakia solar energy storage configuration requirements**

## Overview

---

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

How many residential PV systems were installed in Slovakia in 2024?

This means that over 1,000 residential PV systems put into operation in Slovakia in 2024 could have been equipped with a BESS, resulting in a total additional storage capacity of nearly 7,200 kWh for this category of sources.

How much solar power does Slovakia have in 2024?

At the end of 2024, solar PV market in Slovakia peaked at a cumulative installed power of 1,114 MW. This total is a combination of DC and AC power owing to the fact that until 2022 all data were reported only at DC side and from 2023 onwards new installations are defined at AC nominal inverter output.

How many solar PV plants are there in Slovakia?

There are currently 479 utility-scale ground-mounted solar PV plants with almost 586 MW of installed capacity and 528 MW of rooftop PV systems in Slovakia. The largest solar PV plant to-date was commissioned in 2024 in the municipality of Iliašovce (Košice Region) with installed power at 6.3 MW.

## Slovakia solar energy storage configuration requirements
