

Smart Outdoor Micro Inverter

Overview

Available in 600W, 700W, and 800W models, it features Wi-Fi remote monitoring, automatic voltage detection, and reverse transmission technology, ensuring high efficiency, safety, and smart operation. What is a smart micro inverter?

Smart micro inverters are often used in farming generation systems, power stations, and household use. 2400 watt grid tie solar inverter, smart and cheap micro inverter with 433MHz wireless communication, operating in a voltage of 22-60V, IP65 waterproof design.

What is a solar micro inverter?

Series of solar micro inverters provided on inverter.com online store are small inverters with rated power 300 watt-2800 watt, converting 24 volt/ 48 volt DC power from the solar panel to 120 volt/ 230 volt AC power and are attached to each panel in a solar system. IP65 waterproof design can effectively prevent rainwater on the surface erosion.

What is a micro grid inverter?

Micro grid inverter is widely used in rooftop power stations, farmland irrigation, and PV communication stations. Competitively priced solar micro inverters can better track the change of solar luminosity and control different output power by the MPPT function, effectively capturing and collecting sunlight.

What is the maximum working current of 120W solar PV micro inverter?

The maximum working current of 120W solar pv micro inverter is 7.5A. This grid tie micro inverter uses aluminum alloy material, metal can conduct heat better. Micro grid inverter built-in high-performance maximum power point tracking (MPPT) function, efficiency can reach 99%.
