

Smart hybrid inverter factory in Monaco

Overview

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

What is the difference between hybrid and off-grid inverters?

Hybrid inverters are grid-tied, allowing the use of solar power while staying connected to the utility grid. Off-grid inverters operate as standalone systems, independent of the electrical grid, relying solely on solar panels and batteries.

How do I select a hybrid inverter?

When choosing a hybrid inverter, it's important to consider its capabilities and how they can be customized to suit your needs and preferences. To help you make an informed decision, consider consulting with an accredited solar and battery specialist like Jason Svarc, who has over a decade of experience in designing and installing solar and battery systems.

What is the power range of a hybrid inverter?

The Hybrid Inverter power range is from 3kW to 60kW, compatible with low voltage (40-60V) batteries and high voltage (150-800V) batteries. Sunplus latest EV Charging Station product line offers a range of innovative solutions to meet diverse charging needs.
