Overview

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What factors affect solar storage costs?

Several factors, such as local weather patterns, sunlight intensity and duration, and regulations and incentives for solar storage installations, can affect these costs. In some areas, incentives may be available that can help you lower your upfront costs and increase your return on investment.

How long does a PV solar system last?

In general, the payback time can range from 5 to 10 years. However, it depends on several factors, such as the initial cost of the system, available incentives, rebates, the cost of electricity where you live, and the amount of PV solar electricity you can store and use.
