# Solar Energy Supporting Site Project

## Overview

---

What is the solar project development process?

The solar project development process involves a detailed, multi-phase approach, including site selection, regulatory approvals, system design, financing, construction, testing, and ongoing maintenance to bring solar energy projects from concept to long-term operation.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

How many solar projects are in the pipeline?

There remains an enormous amount of capacity in the pipeline, with more than 160 GWdc of large-scale solar projects either under construction or under development. The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

How many solar projects are there?

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.
