# Solar Energy System in Barcelona Spain

## Overview

---

Does Barcelona have solar energy?

Spain's solar energy plants are located in the southwest of the country, but Barcelona can produce their own energy from here in the northeast. The city is committed to developing new, eco-friendly sources of energy at home and has pushed forward with their green energy plan.

Does Spain still have solar power?

But because of Spain's earlier development, the country still remains ahead in concentrated solar power compared to nations just starting out in the sector, and solar energy makes up a third of the power systems installed in the country, a much higher ratio than in many other countries.

How much does it cost to install solar panels in Spain?

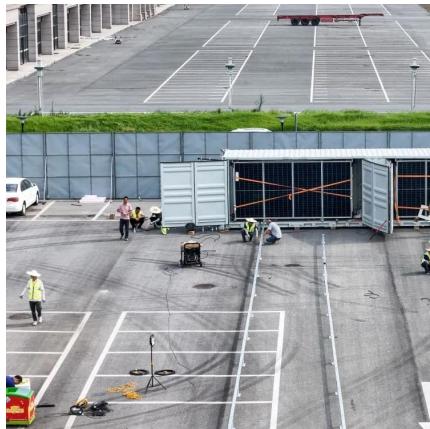

The cost of installing solar panels varies based on your energy needs and location in Spain. On average, it costs between €6,500 and €10,000 (excluding batteries). Eltex offers an all-in-one solution combining solar panels, energy storage, and smart power management, you can enjoy self-consumption and maximise your energy savings.

Can solar energy be used in a new building in Barcelona?

Legally speaking, building owners must install systems for collecting solar energy to produce clean water and electricity in new or renovated buildings whose uses, residential or commercial, have undergone major changes. Barcelona has the opportunity to turn homes into small clean-energy generation plants to offset the energy consumed daily.
