

Solar cells and modules gross profit and net profit

Overview

What is the forecast for solar module shipments in 2025?

For full year 2025, the Company estimates its module shipments to be in the range of 85.0 GW to 100.0 GW. The Company expects its annual production capacity for mono wafer, solar cell and solar module to reach 120.0 GW, 95.0 GW and 130.0 GW, respectively, by the end of 2025.

Why did JinkoSolar's revenue decrease in Q1 2025?

Image: JinkoSolar. Four leading Chinese PV companies, JinkoSolar, LONGi Green, JA Solar and Trina Solar, recently released their financial reports for Q1 of 2025, all with a decrease in their revenue. Affected by the continuous decline in the prices of the PV industry chain, when compared with 2024, the revenue of each company decreased.

How many solar modules were delivered in the first quarter 2025?

Module shipments for the first quarter 2025 were 17.5 GW, ranking first in the industry. At the end of the first quarter, we became the first module manufacturer in the world to have delivered a total of over 320 GW solar modules, covering nearly 200 countries and regions.

How did our solar PV module manufacturing plant's financial model work?

Our solar PV module manufacturing plant's financial model was meticulously modelled to satisfy the client's requirements. It provided a thorough analysis of production costs including capital expenditures, manufacturing processes, raw materials, and operating costs.
