

Solar combiner box for sale

Overview

What is a solar PV combiner box?

Cost-effective solar pv combiner box for sale online, with 4/6/8/10 pv array input numbers, maximum open circuit voltage 1000V, single way input array maximum current of 10A, protection class Ip65. Solar combiner boxes have a current-attack, over current protection, over-voltage protection and a series of perfect protection.

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.

Can a combination box be installed near a solar array?

Combiner boxes are designed for installation near the PV array with each series string of solar modules connected to one of the fused/breaker circuits. The solar array input strings may be combined, yet only a single pair of wires is required between the Combiner Box and the PV controller location.

What is a combiner box?

Combiner Boxes provide a secure, economical and code compliant method of combining multiple PV source circuits into one circuit. The combiner box also provides a convenient location to begin the necessary conduit run from the PV array to the power conditioning equipment.
