

LLSE CONTAINERS

Solar container outdoor power 2 kWh with built-in inverter

Overview

How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How big is a solar energy system – 450 x 210 x 321 mm?

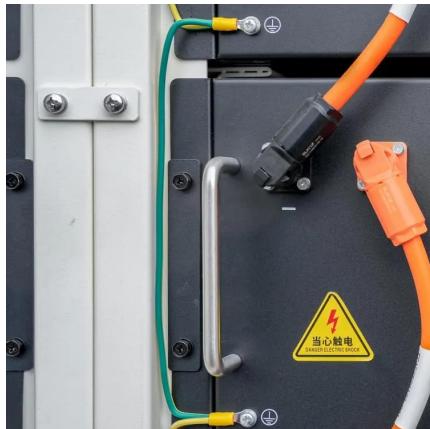

Equipped with an LCD display with an intuitive graphical interface that allows you to understand how the system is working. Compact dimensions (450 x 210 x 321 mm) and a weight of about 24 kg make it suitable for various installation environments, whether you want to mount it on the floor or integrate it into a larger energy system.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
