

Solar energy storage charging pile carport

Overview

What is SolarEdge Solar Carport?

SolarEdge Solar Carport solution combines PV harvesting, EV charging, and battery storage, to help create additional revenue and enable the charging of electric vehicles with clean energy, while prioritizing energy availability and cost efficiency. Maximize solar yields by optimizing energy production from each panel.

How does a solar carport work?

The electricity being produced by your solar carport is just like any other solar energy — it can be used in your home, stored in a battery, exchanged for credits in the grid, or funneled into your EV battery. Overall, a solar carport gives you a significant amount of flexibility over how you use your solar energy.

Why should you install solar carports?

Maximize the profitability of underutilized outdoor parking areas and provide shade for parked vehicles to lower the energy required to cool them and help protect them from sun damage, by installing solar carports.

Does a solar carport come with a battery?

In any new solar array, your installer can also supply a battery or EV Charger, if desired, at an additional cost. Delivery and Installation Process. Delivery is not included in the price, phone the office for a delivery quote. The Double Solar Carport is easy enough for DIY installation.
