Solar glass enclosed balcony

Overview

What is a balcony Solar System?

These balcony solar systems offer you an easy way to generate sustainable solar energy on your balcony. Solar systems are easy to install and can be mounted on your balcony. They consist of high-quality solar modules, charge controllers, and inverters that integrate the generated energy into your power supply.

Can solar panels be installed on a balcony?

Solar systems are easy to install and can be mounted on your balcony. They consist of high-quality solar modules, charge controllers, and inverters that integrate the generated energy into your power supply. By using our balcony PV systems, you not only generate electricity yourself but also contribute to the reduction of CO2 emissions.

What is a solar balcony railing?

Solar balcony railings can be used as a vertical building element for balconies, multistory parking lots or area separation. Metsolar Solar balustrades can be uniquely designed: Panels can be colorful or transparent with adjustment of transparency, custom module size, shape and dimensions, having required power options in mind.

Why should you choose a balcony Solar System?

Our balcony solar systems offers flexible expandability, allowing you to increase its output at any time by adding additional component modules. This means you can start with a smaller system and, as your needs grow, expand your power generation capacity by installing extra solar modules.
