

Solar inverter enclosure

Overview

A solar inverter enclosure is a protective housing designed to safeguard the inverter and associated electrical components from environmental factors such as dust, moisture, temperature extremes, and physical damage. What makes a good inverter enclosure?

Easy Installation: Allows quick bolt-in installation. Appropriate mounting nuts all supplied. Vented Enclosure: Provides efficient ventilation to allow the best performance from your inverters. Corrosion Conscious Design: High quality powder coated Zinc Anneal enclosure.

What is a solar enclosure?

The enclosures are specifically approved for use in solar power systems, designed in one piece monobloc, which provides excellent protection for inside electrical and electronic components. Also it has IP66 sealing and IK10 maximum possible resistance. Do you need extra info?
