Solar n-type double-glass module

Overview

What are n-type double glass bifacial modules?

The N-type double glass bifacial modules optimize light absorption on both sides, boosting energy generation. The half-cell configuration reduces hot spots and mechanical stress, while also minimizing shading and resistive losses.

How are bifacial solar cells encapsulated?

Bifacial solar cells can be encapsulated in modules with either a glass/glass or a glass/ transparent backsheet structure.

Are dmegc solar modules reliable?

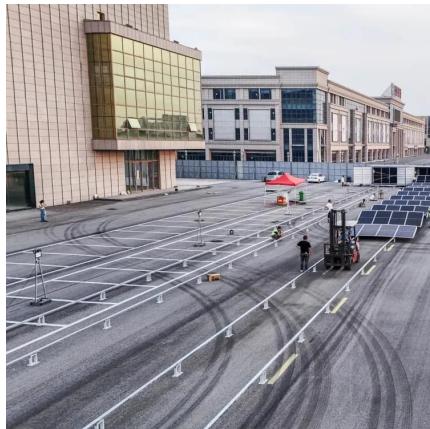

With extensive accreditations including ISO, IEC, and TÜV certifications, DMEGC Solar modules are a reliable and valuable choice for all your solar energy needs. DM500M10RT-B60HBT – 500W N-Type Bifacial Double Glass Module.

What is the preferred structure for the rear side cover of n-type modules?

Dual glass is the preferred structure for the rear side cover of the N-type modules because the glass-glass version can maximize the advantages of the N-type.
