

# Solar panel seams

## Overview

---

Can solar panels be installed on a standing seam metal roof?

When installing solar panels on a standing seam metal roof, special mounting hardware is used to attach the panels securely to the roof without penetrating the surface. This helps maintain the watertight seal of the roof and prevent any damage or leaks.

What is a metal standing seam roof with bonded solar panel?

This metal standing seam roof with bonded solar panel delivers an efficient and effective roofing system that performs just as well as it looks. Unlike traditional mounted solar photovoltaics systems, Catnic SolarSeam is bonded to the roof panel, offsite, creating a low-profile and seamless finish that's guaranteed to produce energy for 25 years.

What is a standing seam metal roof?

Overall, a standing seam metal roof is an excellent choice for commercial, industrial, and residential buildings that require a durable and long-lasting roofing system. When combined with solar panel installations, this type of roof can provide a sustainable and cost-effective solution for generating clean energy and reducing energy costs.

What is Catnic solarseam?

With Catnic SolarSeam, it's now easier to integrate solar panels into the building fabric while protecting integrity of the overall design. This metal standing seam roof with bonded solar panel delivers an efficient and effective roofing system that performs just as well as it looks.
