Overview

What is a solar panel system?

Solar panel systems are often referred to as PV, or photovoltaic, solar power systems. The home installation of a high-quality solar power system can reduce or eliminate dependence on the utility power grid that supplies electricity to light, heat, cool, and operate your home.

What is a roof-mounted solar panel system?

A roof-mounted solar panels system absorbs and converts the energy-packed photons of natural sunlight into a usable energy form. Solar panel systems are often referred to as PV, or photovoltaic, solar power systems.

What is independent photovoltaic power generation?

Independent photovoltaic power generation is also called an off-grid photovoltaic system, which is different from a grid-connected system by adding a controller, battery, and AC inverter. Sunrise company China has thousands of solar system solutions, focusing on the design of the distributed photovoltaic system.

What equipment do you need to go solar?

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where you live, you may also consider a solar battery. The components of a solar panel system are pretty simple.
