

Solar panels for apartments

Overview

Can solar power be used in an apartment?

In most cases, you can use solar power in your apartment. However, it may not be as straightforward as asking your landlord to install a solar panel on the roof or buying one yourself.

Are there solar panels for apartments?

Yes, you can install solar panels in your apartment. There are several companies that sell solar panels for apartments; however, powering your entire apartment on solar energy may be a lofty task.

Are solar panels a good option for renters?

But if panels are too costly or just not feasible, purchasing renewable energy from a clean energy provider can offer the same emissions savings. Though options, like installing solar panels, are only available to people who own their home, there are plenty of other things that both renters and owners can do.
