

Solar panels installed in the yard

Overview

How do I install ground-mounted solar panels?

When it's time to fit your ground-mounted solar panels, installers will first need to dig a trench - around 450mm deep - from the solar panels to your property. This is to fit the cable that will transmit power from your array to your home's electricity supply.

How to install solar panels in a garden?

Before you can install your solar panels, it's crucial to prepare your garden space. Clear the area of any debris, obstacles, or overgrown vegetation that might obstruct sunlight exposure to your panels. This ensures a clean and accessible workspace for installation. Mounting and Placement of Solar Panels.

How do you install a solar system?

Secure brackets and rails, then measure for subsequent brackets using a solar panel for accuracy. Install wiring (if needed), secure panels, and repeat until the system is complete. Attach panels to brackets, ensure connections are secure, and install retaining clips. Finally, connect your solar system to the inverters.
