# **Solar panels on rural roofs in the Middle East**

## Overview

---

Are rooftop solar panels a viable option in the Middle East?

Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East. Despite the sunny climes, there are still a number of barriers to switching to solar PV. Electricity tariffs are generally low, discouraging customers from switching to self-generated electricity.

Is the UAE a 'front runner' for solar PV?

The Middle East Solar Industry Association ( MESIA) describes the UAE as a regional " front runner " for PV with Oman starting to add more significant projects to the regional PV pipeline. Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East.

Why is solar energy important in the Middle East?

with many benefits — light, warmth, and the energy needed to power our world. In the Middle East and around the globe, solar energy has become a pillar of many renewable energy strategies. Solar photovoltaic (PV) technology, in particular, is deemed critical in hitting energy targets. Gl.

Is the Middle East a good place to invest in solar energy?

unt for 95% of global renewable expansion by 2028. The Middle East's potentialThe Middle East, being a region blessed with high solar irradiance, brims with much potential for solar energy. Receiving over 2,000 kWh/m<sup>2</sup> annually in solar irradiation and benefiting from an 89% drop in solar generation costs since 2010, the region could lever
