

# Solar power generation system for Swedish villas

## Overview

---

Does the Swedish Villa zero have a smart solar roof?

The awarded Swedish Villa Zero has a Smart Solar Roof of GruppSol. Villa Zero, a carbon-neutral detached house, has won the 2022 Solar Energy Award of Svensk Solenergi (Swedish solar energy association) in the category Facility of the Year.

Is Sweden a good place to invest in solar energy?

Sweden is well known for its leadership in sustainability and energy system transformation; however solar photovoltaics (PV) have typically been left out. Rapidly decreasing PV system prices have made rooftop mounted systems increasingly interesting for residential buildings, where consumers can also be producers; also known as prosumers.

Can solar PV integrate into a residential cooperative's energy system?

Rapid declines in the cost of solar photovoltaic modules have made rooftop mounted systems economically interesting in Sweden, especially large scale systems for multi-family housing. This project seeks to understand how solar PV can technically and economically integrate into the residential cooperative's energy system.

Is solar PV a good investment for Swedish cooperatives?

The investment recovery time is still long, with the simple and discounted payback times in the common case being 18 and 25 years, respectively. The primary conclusion from these studies is that solar PV is a good investment for Swedish cooperatives with roofs well positioned for solar.
