

Solar power station in China in Denmark

Overview

How does the Danish Energy Agency work with China?

The Danish Energy Agency has worked with the Chinese government on a green energy transition since 2005. The cooperation focuses on supporting China in building a stable, flexible, cheap and green energy system to avoid catastrophic climate change.

How many solar PV installations are there in Denmark?

The latest version can be found below and shows a total expansion of solar PV in Denmark of more than 3.3 GW as of 1 July 2023. The installations consist of both large installations in the open country as well as smaller installations, mainly on rooftop. Solar PV Statistics 2nd quarter 2023 (Only available in Danish).

What does the Danish Energy Agency do?

In the field of district heating, the Danish Energy Agency and our partners work with pilot cities in Chinese provinces, providing training to local officials to improve heat planning and sharing Danish expertise to facilitate the integration of heating into the overall energy system.

Who is involved in the Danish energy agency cooperation?

As part of the cooperation, the Danish Energy Agency draws on a range of Danish stakeholders including Energinet, EA Energy Analysis, State of Green and the Danish Embassy in Beijing.

Solar power station in China in Denmark

[Denmark's second largest PV plant goes online](#)
